

# Center 322 SLM

## Product Overview

The Center Model 322 is a compact, economical and portable sound level meter with datalogging functionality.

The 322 is a professional 'Type II' meter with range selection and both digital and bar graph indication. A handy feature of the firmware is that the unit remembers settings after it is powered off.

A USB cable for interfacing with a PC is included in addition to free PC software for meter configuration, data download, and data viewing.
