

SAAV Manual

This manual contains information related to Measurand's SAAV geotechnical instrument. SAAV is the newest and most advanced ShapeArray™ model. Inspired by direct feedback from customers, Measurand developed a new installation method unique to the SAAV that allows the instrument to be installed easily into existing conventional inclinometer casings.

This manual's pages, or the manual in its entirety, can be saved as a printable PDF by selecting the  button near the top right side of the page.

Detailed information for other Measurand products are available within their respective manuals.
